HA HOANG DUY

FRONTEND DEVELOPER

CONTACT INFORMATION

0854021102

hahoangduy.it@gmail.com

https://bio.link/meonef

District 1, Ho Chi Minh City

SKILLS

PROGRAMMING LANGUAGES:
HTML & CSS, TypeScript, JavaScript, C#

FRAMEWORKS
Angular, .NET, NestJS

DATABASE MANAGEMENT:
MySQL, MongoDB, SQL Server Management Studio (SSMS)

FRONTEND:
Angular Material, HTML5 & CSS3, Bootstrap, TaigaUI

VERSION CONTROL:
Git, Github

OTHER KNOWLEDGE:
Docker, Redis, API testing with Postman, Figma (UI/UX design to frontend implementation)

CERTIFICATION

ITSS
09/2025
Web Fullstack Development – ITSS

Samsung Innovation Campus
10/2025

CAREER OBJECTIVES

As a recent graduate with a strong foundation in Frontend development (Angular, TypeScript, JavaScript), I am eager to apply my skills in a professional environment. I use process management tools such as Taiga and GitHub to track progress and collaborate effectively in Agile/Scrum workflows. I also have basic knowledge of AI and CI/CD, including using GitHub to automate simple build and deployment tasks.
I continuously work on improving my ability to create intuitive and user-friendly interfaces. In addition, I aim to expand my Backend knowledge, such as developing APIs and working with databases, to become a more well-rounded developer. I look forward to contributing to the company's projects and growing in a dynamic, collaborative environment.

EDUCATION

INFORMATION TECHNOLOGY **2020 - April 2025**

Hoa Sen University

During my studies at Hoa Sen University, I completed courses in Web Development, Object-Oriented Programming (OOP), Software Project Management, Databases, Software Testing, IoT, and Artificial Intelligence (AI). I am proficient in HTML, CSS, JavaScript, C++, C#, Bootstrap, and React Native.

I participated in various practical projects, including the "Library" app (React Native) as a team member, and my capstone project **"Motorcycle Rental"** as a Fullstack Developer, using Angular for frontend and integrating backend services. For this project, I:

- Built backend services using NestJS with modular architecture (controller–service pattern), improving code maintainability and enabling scalable feature expansion.
- Implemented state management with NgRx in Angular, reducing component coupling and improving data flow consistency across the application.
- Designed and managed MongoDB databases for efficient data storage and retrieval.
- Integrated frontend with backend APIs to display real-time data.
- Applied Clean Code principles, managed source code on GitHub, and conducted pull requests and code reviews.
- Managed the project using Agile Scrum, organizing work into short Sprints to plan, implement, and review features efficiently.

BIG DATA **July 2025 - October 2025**

SamSung

- Learned basic concepts of virtual machines, Spark cluster, HBase, Linux, HDFS, Hive, and Docker.
- Completed small exercises and assessments, gaining hands-on experience.
- Received a Big Data certificate issued by Samsung.

WORK EXPERIENCE

WEB DEVELOPER **Sep 2024 - Jan 2025**

Big Data – Samsung Innovation Campus

INTERESTS

- Playing Football
- Programming
- Listening to music
- Participating in volunteer activities to help those in need and contribute to social and community activities

MSc. Pham Thi Kim Ngon
Lecturer, Factulty of Infomation Technology at Hoa Sen University
Email:
ngon.phamthikim@hoasen.edu.vn

Dai Phat Solutions (DPS)

- Using Angular and .NET, I developed an Employee Management System with role-based access control, pagination, and search features, improving internal data handling efficiency by approximately 30%.
- Applied SQL Server and optimized queries in SSMS to manage relational data, reducing data retrieval time by around 20% across core modules.
- Implemented RESTful API integration between frontend and backend, ensuring real-time data synchronization and reducing manual processing errors by 25%.
- Converted UI designs from Figma into responsive Angular interfaces, improving user experience consistency and reducing UI revision time by 15%.
- Worked directly with 5 clients to gather requirements, clarify business logic, and adjust features accordingly, helping deliver the project on schedule.
- Applied Agile (Scrum + Kanban) methodology using GitHub for version control and pull requests, contributing to a 20% faster feature delivery cycle compared to initial planning.

WEB DEVELOPER **Jan 2023 - Sep 2023**

ITSS

Internship & Capstone Project: Course Website – Fullstack Developer

- Received training on reporting, presentations, and Web Development tools including Angular, NestJS, TypeScript, JavaScript, MongoDB, Node.js, Canvas, Docker, Figma, and Taiga.
- Developed a fullstack course website using Angular and NestJS, integrating RESTful APIs to deliver dynamic content and improve user interaction.
- Applied state management, Clean Code principles, and used GitHub/GitLab for source control, pull requests, and code reviews.
- Managed the project using Agile Scrum, organizing work into short Sprints, gaining experience in teamwork, project management, and meeting product requirements.
- Completed practical exercises and assessments, earning a Web Fullstack Development certification.
- Enhanced practical skills in Web Fullstack Development, learning to implement designs from Figma to a functional web application.
